

Who we are:

BlueVector is a management consultancy serving largely (though not exclusively) the medical device, pharmaceutical, and biotechnology sectors.

Our speciality:

Company formation and growth, and the definition, development and commercialization of innovative technologies, products, and processes.

What we offer:

An exceptional breadth of technical and business knowledge, gained from many years of international experience, resulting in customized solutions tailored to our clients' needs and objectives.

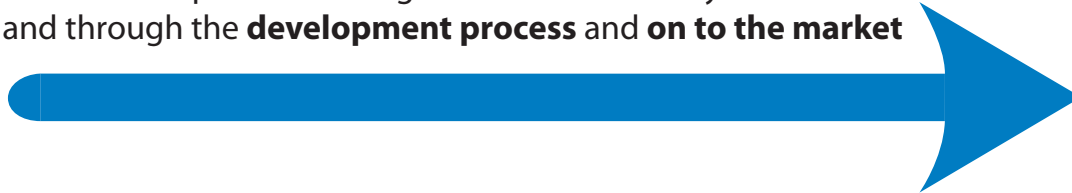

Our client base:

Start-ups, university spin-outs, established companies, and public sector organizations (national and international).
